

AOI

To feel new for years to come

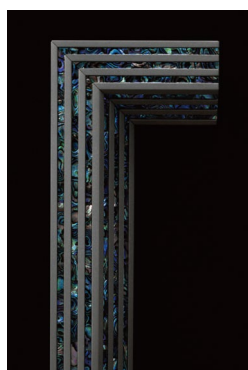

The combination of the beautiful color and brilliance produced by shells over many years and the heavy texture of metal give the impression of presence and leave a lasting impression in the memory of those who confront the space.

The extruded base material can be infinitely stretched and adjusted to the size of the fittings, and can be used in a versatile manner by combining it at different angles. By changing the dimensions to match the scale of the fittings, it gives a sense of fit to the space as if it were custom-made.

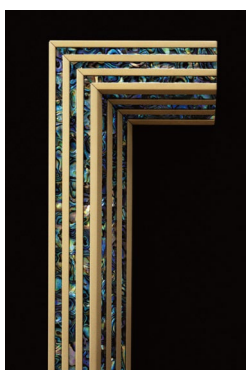

By inlaying mother-of-pearl into the multiple grooves of the cross section, it can be felt at a distance that can be touched by hand, while protecting it from deterioration in the process of using it over a long period of time.

The contrast between the matte texture of the anodized aluminum and the shiny texture of the raden enhances each other's materials.

The design, which is both classic and modern, allows the item to add a sense of luxury and dignity to any space where it is installed.
