## Handles Encased in Transparent Acrylic to Enhance the Depth of Brass

Approximately 60 years ago,  
UNION Elmes created door handles  
by encapsulating metal in acrylic,  
a design that we've now replicated.  
Despite the difficulty in repairing or reproducing them,  
we managed to locate skilled craftsmen  
with advanced techniques to finally bring the product to market.  
The design gives the impression of brass floating  
within transparent acrylic,  
with the brass gradually developing a patina over time.

## RG1298

	<b>RG1298-15-53</b>
<b>Material</b>	brass, acrylic
<b>Finish</b>	polished
<b>Caution</b>	Cannot be wiped off with alcohol
